

OLYMPIC GAMES

The Olympic Games are the only truly global, multi-sport and festive athletics competition. The **15** sport shooting discipline events including **12** individual and **3** by team will welcome **340** shooters from about **100** countries around the world

SHOOTING EVENTS

From five events at the inaugural 1896 Games to 15 across six disciplines today, the sport has grown steadily alongside advances in firearms technology.

The current six disciplines consist of four with stationary targets: air pistol, air rifle, 25m pistol (rapid fire for men) and rifle three positions (kneeling, prone, standing).

The other two involving moving clays are trap (where the clay moves away from the shooter), and skeet (where the clay, or sometimes two clays, moves across the shooter).

Why a French National Shooting Sports Centre ?

The French Shooting Sports Federation wanted people to be able to participate in **all twelve shooting sports disciplines in one and the same place**. In 2012, it took advantage of the opportunity to acquire 80 hectares of La Martinerie (a former military camp), in Châteaoux-Déols. The members of the French federation helped to raise 80% of the funding required for the new Centre, with national and regional support.

Work started in March 2016, the main building work was finished in August 2017 and the fitting out of the different ranges went on right up until the inauguration in May 2018. All the French National Shooting Sports Centre (CNTS) ranges are entirely accessible to **people with reduced mobility** and respect environmental and sustainability certification requirements (HQE).

An ambitious Centre with both a national and an international vocation

As of today the French National Shooting Sports Centre (CNTS) is on the list of sites able to host the **biggest national and international competitions: World Championships, World Cup, European Championships, French Championship etc.**

The French National Shooting Sports Centre (CNTS) is also at the heart of federal development schemes. It allows the National Technical Committee to organise training modules for the French teams, preparation periods for large sporting events and specific training courses: referees, coaches, etc. It will also be accessible to foreign teams.

For the French Shooting Sports Federation, the French National Shooting Sports Centre CNTS represents **a home for all shooters**. Time slots will regularly be reserved for leagues, clubs and even individual members. It will also be used from time to time as a tool to enable companies to introduce their employees to the sport of shooting.

The facilities

The French National Shooting Sports Centre (CNTS) is the only civil sporting facility able to host all shooting sports disciplines from 10 to 600 metres on a European scale.

Discipline	Distance	Number of stands
Field Crossbow	18m 35/50/65m (IR 900)	54 mat
Match Crossbow	10m 30m	30 stands 28 stands
Historic Firearms	25m 50m 100m Clay Target	36 stands 40 stands 40 stands 2 trenches
Bench Rest	50m (22 Hunter) 100/200m	40 stands
Rifle	10m 50m 300m 600m	80 electronic targets 80 electronic targets 30 electronic targets 20 electronic targets
Running Target	10m 50m	3 stands 2 stands
Pistol	10m 25m 50m	80 electronic targets 60 electronic or paper targets 80 electronic targets
Clay Target	5 stands for Skeet, Trap and Double Trap	
Metallic Silhouettes	25m to 500m	
Regulation Firearms	25m 50m 200m	24 stands 80 electronic targets 40 electronic targets
Practical Shooting	25m to 200m	33 slots

Opened in 2018, the French National Shooting Sports Centre (CNTS) is one of the largest international shooting ranges. Its primary vocation is to host national, European and world championships in all disciplines.

Located in the centre of France, less than three hours from Paris, it is easy to get to by road and by rail. It is also located close to Châteauroux Airport.

ACTIONS CARRIED OUT BY THE FRENCH SHOOTING SPORTS FEDERATION (F.F.Tir)

in order to limit the effects of lead upon the shooters as well as upon the environment in its Shooting Sport National Center

1- The National Center in Châteauroux-Déols (CNTS)

1- The National Center in Châteauroux-Déols (CNTS)

2- Preventive measures. A poster created in collaboration with the French Health Agency (SPF), is in display in every and each shooting range

Pour éviter toute contamination par le plomb 3 GESTES SIMPLES LORSQUE JE PRATIQUE LE TIR

1 Mes bonnes habitudes

- Pendant mes entraînements, je ne mange pas, je ne bois pas et je ne porte jamais mes mains à ma bouche sur le pas de tir.
- Durant les compétitions, pour m'hydrater je bois dans une gourde.
- Dès que je quitte le pas de tir je me lave soigneusement les mains.

2 Mon Équipement

- Je privilégie une tenue spécifique pour tirer.
- Je ne la mélange jamais avec d'autres vêtements, je la nettoie fréquemment.
- Je change de chaussures ou j'essuie celles que je porte avec un tissu humide.
- Je nettoie mon arme sur place dans l'espace réservé à cet effet.

3 Ma vigilance

- Je rappelle régulièrement à mon médecin traitant que je pratique le tir sportif.

3- Removal of textiles inside 10 meters shooting ranges: floor carpets and table fabrics

4- Implementation of Sius lead collectors on 10 meters targets

5- Replacement of sand back stops behind the 25 meters targets by Sius lead collectors

5- Replacement of sand back stops behind the 25 meters targets by Sius lead collectors

6- Removal of floor carpets in the 50 meters range

7- Replacement of sand back stops behind the 50 meters targets by Sius lead collectors

7- Replacement of sand back stops behind the 50 meters targets by Sius lead collectors

8- Powerful mechanically controlled ventilation in the Hall of Finals

FFTIR

10- Replacement of the natural lawn by an artificial one on the shotgun shooting range, in order to facilitate lead projectiles and broken targets collection (this work is still in progress due to the weather conditions)

10- Replacement of the natural lawn by an artificial one on the shotgun shooting range, facilitation of lead projectiles and broken targets collection (this work is still in progress due to the weather conditions)

9- Implementation of a new drainage network on the shotgun shooting range

FFTIR

11- Regular cleaning of the facilities with a specific focus on lead pollution
(sweeping, vacuum cleaning and washout)

12- TOTAL INVESTMENT TO AVOID ANY LEAD POLLUTION

10m Range	80 shooting lines	80 Bullet catchers - Ground and tables carpets
25m Range	60 shooting lines	60 Bullet catchers - Tables carpets
50m Range	60 shooting lines	60 Bullet catchers - Ground and tables carpets
Shotgun Range	3 500 square meters	Synthetic grass + Drainage pipes

Thank you for your attention !
